

Raw BoneActiv™

Bone density support-plus*

Wild Spice Bone and Joint Health Support*

BoneActiv is the greatest advance yet for supporting bone and joint health.* Raw BoneActiv capsules are far more potent than calcium or vitamin D alone. This is raw calcium from microcrystalline hydroxyapatite (MCHC), derived from grass-fed New Zealand cattle. It's combined with powerful, wild, mountain-grown, calcium-concentrating spices: sage, oregano, and rosemary. Researched for their bone-strengthening effects, MCHC and mountain spices are the subjects of significant scientific studies, demonstrating their novel powers for supporting bone health.* Raw MCHC is far more active biologically than heat-treated alternatives. Sage, oregano, and rosemary grow wild on rock, not on soil, absorbing the minerals. This bioavailable concentration of minerals—calcium, phosphorus, copper, and zinc—is essential for supporting healthy, bones and age-related bone loss.*

BoneActiv Rubbing Oil is based on the power of wild oils of sage, rosemary, and oregano, three of the most potent mountain herbal oils known. Look up the research. It is astounding what has been discovered regarding the power of these truly wild-source oils. Rub BoneActiv on the bottoms of the feet and shin-bones once or twice a day. BoneActiv is absorbed right through the pores of the body, and the bottoms of the feet have the biggest pores of all. Also, rub on any bony area that needs help. When rubbing on any area, do so vigorously. It is powerful rubbed on the chest, as the activating compounds also work through inhalation. For quick results rub into the skull at the base of the head. Also, take a few drops daily under the tongue or

in juice or water. For fast action use with Raw BoneActiv capsules. Also makes an ideal rub up and down the spine.

Bone loss is a major cause of pain and reduction in activity. Lives are significantly altered. Support the health of your bones with Raw BoneActiv and *stay active*, all life long.*

Science-based, high potency
