

Raw Intestinal Health *Plus*  
**GreensFlush™**  
Supports healthy detoxification\*

**Triple-greens blend • Enzymes & nutrients intact • High quercetin • High riboflavin**

This is the original triple wild, raw greens extract, and the only truly plus raw wild greens extract available. GreensFlush is made from remote-source wild dandelion, wild nettles, and wild burdock leaf extracts. Spring greens are the source of new life—they are found in far northern forests. Such greens contain a wide range of compounds which have a positive effect on the human body. These wild greens extracts are highly cleansing.

This is the ideal form of wild greens—as raw, wild sublingual drops. Moreover, these wild greens drops are highly dense in nutrients, especially trace minerals and B vitamins, particularly Vitamin B<sub>2</sub>. This vitamin, also known as riboflavin, is the key vitamin for stimulating the use of oxygen by the body. This oxygenation function is critical. GreensFlush contains one milligram of riboflavin per ounce, which is exceedingly dense. B<sub>2</sub> is invaluable for proper health and nutrition of the skin, eyes, and whole body.

GreensFlush activates the whole system; use it for the wild power you need. The wild greens are picked fresh in the wilderness, so their full power is intact. The extract then undergoes gentle fermentation. The process is unique, because no heat is applied, and thus, all the nutrients remain intact, including the enzymes, globulins, albumins, molecules, flavonoids, and vitamins.

With the wild vitamins there is a high degree of potency versus synthetic ones made from coal tar. That's due to trapped electrical energy in the form of photons which is devoid in synthetic types. In particular, wild, natural riboflavin is highly electrically charged and is known to have its own glow. Heat destroys this electrical nature, weakening the effect. In GreensFlush, the electrical charge of the vitamin remains intact. The existence of this electrical charge has been documented. Szent-Gyorgyi has determined that it is

represented as a yellowish-green florescence. M. Gallert in *New Light on Therapeutic Energies* notes how nutrients in food create florescence through the release of energy, which is essentially trapped sunlight. All this energy transmission is nonexistent in synthetic vitamins. Gallert also notes that the color green of a supplement defines its power. This, he said, is the color most needed to balance the body. This is why it is ideal to take the GreensFlush sublingually, which allows for more immediate absorption—and that's why it is so powerful as a cleanse.

The natural wild flushing agents, of these—nettles, burdock, and dandelion leaves—may also contain wild chickweed and/or lamb's quarter extract depending on the seasonal harvest. All these fresh leaves contain a plethora of flavonoids as well as powerful sterols, amino acids, and saponins. That's why GreensFlush helps open up the gallbladder and liver like no others.

**How to use GreensFlush:** Take ten or more drops under the tongue twice daily. GreensFlush may be added to salad dressings or tomato juice. Take your wild greens drops daily.

**Note:** This is not the same as powdered greens products, since it is a whole, raw, wild food and has completely different actions than any other greens product.
