

Wild-source extract™ Hempanol™ De-stress Shot

Full spectrum hemp complex • Turmeric & ginger fortified • Mind & body relaxation support*

What a unique formula it is. This is a specialized, water-soluble form of raw, organic hemp plant extract. Containing the full profile of phytochemicals, including all the hemp-based terpenes, beta caryophyllene, pinene, linalool, and limonene, as well as over 60 novel cannabinoids for feeding the endocannabinoid system, it is potent. Fortified with freeze-dried, organic, wild turmeric, organic ginger, and natural, organic cinnamon bark extract, it is a super food formula, ideal for combating stress and for supporting a natural relaxation response: internally calm but still strong and alert.

The specialized extracts of turmeric, ginger, and cinnamon are specialized, too. These are 100:1 extracts, giving the optimal potency you need for a quick shot of de-stress action. As well, organic, freeze-dried turmeric supports a healthy cognitive response, and the research is in on cinnamon: it supports brain health, too, while also supporting a healthy blood sugar response. Ginger is no minor addition. It supports a healthy digestive and inflammation response. It becomes clear why Hempanol De-Stress is such a powerhouse for not only mental stress response but also the overall body response, including a digestive and whole-body hormone response. It is the hormone glands which modulate stress, and turmeric, ginger, cinnamon, and, of course, hemp extracts all aid this. Plus, all these natural extracts are terpene rich, which feeds the endocannabinoid system.

Hempanol De-Stress shot is specially formulated for the person on the go. With its 50-ml shot, only a small amount is necessary, like one fourth. so you get four shots from one container. Feel the relaxation response your body needs. Feel also the energized calm. Support your natural focus response, all by feeding your natural endocannabinoid system, which is especially deficient in our high-stress, on-the-go environment and is depleted by blue light from computers and cellphones. Replenish what your nervous system needs, with Hempanol De-Stress Shot, and feel the raw, organic hemp extract difference.

How to use Hempanol De-stress:

It's potent, so usually a small shot, ideally a teaspoon, is sufficient. Take more, as desired.

- non-GMO
- 100% raw and freeze-dried
